

Release Note: Web Entry 2.0

Web Entry 2.0..... 1

Enhancements 1

Web Entry 2.0

There are some great new features being added to the Web Entry product that will enhance and increase the functionality of the product. Easier access and better photo management are just a few of the new enhancements.

Enhancements

- Upon log-in, reps are directed to their active calls and incomplete sheets (if any) eliminating the need to remember if there is outstanding work to be done.
- The reps name is populated by default in the 'Reps' field allowing for quicker access into a call.
- The call start date and time automatically defaults to the current date and time (see Figure 1).
- The rep can now select all of their assigned divisions (if applicable) within the 'Division' field (see Figure 2).
- Web entry simulates more PDA functionality by introducing the 'Show All' link. This link provides the rep access to 'All' stores within their division or just their 'Assigned' stores (see Figure 3).

The screenshot shows a web application interface with two tabs: 'Calls' (active) and 'Questionnaires'. On the left, there are four dropdown menus: 'Reps' (Toomas, Eric), 'Divisions' (30: CMK(Southeast)), 'Empires' (21/22: CMK(Southeast), 30: CMK(Southeast), NCD: CMK(Pacific)), and 'Stores' (with a 'Show All' link). A list of store names is displayed below the 'Stores' menu, including 1908 - BEDFORD PARK, 1909 - CALUMET CITY, 1911 - CICERO, IL, 1912 - NORTH AVENUE, 1913 - RANDHURST, 1914 - DAN RYAN, 1916 - DOWNERS GROVE, 1917 - GLENDALE HEIGHTS, 1918 - NAPERVILLE, and 1919 - NORTHLAKE. On the right, there are input fields for 'Call Start Date' (03/12/2008), 'Call End Date', 'Call Start Time' (10:24 AM), and 'Call End Time'. A 'GO' button is located below the time fields.

Fig. 1

- Follow-up questions now automatically expand when the appropriate response is selected.
- Photos can now be removed. A 'remove' link is now present providing the ability to remove imperfect or incorrect photos (see Figure 4).
- The status of a sheet (I = Incomplete, Done = Complete) is now available (see Figure 5).
- A rep is now allowed to have only 1 open call (store visit). A call must be closed before another call can be opened (see Figure 6). This function does not apply to Non-ISSI customers.

Calls

Questionnaires

Rep :
Toomas , Eric

Store :
1909 - CALUMET CITY

Date/Time :
3/12/2008 11:11:38 AM
