

RELEASE NOTES: Beacon Reset

We are proud to announce the release of the *Beacon Reset Utility* that allows *District Managers* to adjust the beacon time. This feature will be available through EnfoTrust May 17, 2005.

Follow the instructions on the **Application Upgrade Pending** message. This message will appear when logging into PACE or accessing PACE Utilities. After completing the instructions, begin Step 1.

Step 1... Tap “Start”

Step 2... Tap “Beacon Reset”

Step 3... Tap “ok” after verifying correct PDA date and time. **If the PDA’s date/time is not correct, tap “Cancel” and adjust the unit to the correct time and date. Then resume with Step 1.**

Step 4... Point the PDA at the beacon, “Looking for Signal” will appear on your screen.

Step 5... After the PDA finds the beacon, the beacon date/time will appear. Tap “Set date/time”

Step 6... Wait for confirmation “Beacon date/time has been modified”

Step 7... Tap “ok” to return to the Today screen
